Purpose

You are invited to participate in a survey of students, faculty, staff, and administrators regarding the environment for learning, living, and working at Iowa State. Climate refers to the current attitudes, behaviors, and standards of employees and students concerning the access for, inclusion of, and level of respect for individual and group needs, abilities, and potential. Your responses will inform us about the current climate at Iowa State and provide us with specific information about how the environment for learning, living, and working at Iowa State can be improved.

Procedures

You will be asked to complete the attached survey. Your participation is confidential. Please answer the questions as openly and honestly as possible. You may skip questions. The survey will take between 20 and 30 minutes to complete. You must be 18 years of age or older to participate. When you have completed the survey, please return it directly to the external consultants (Rankin & Associates) using the enclosed envelope. Any comments provided by participants are also separated at submission so that comments are not attributed to any demographic characteristics. These comments will be analyzed using content analysis. Anonymous quotes from submitted comments will also be used throughout the report to give “voice” to the quantitative data.

Discomforts and Risks

There are no anticipated risks in participating in this assessment beyond those experienced in everyday life. Some of the questions are personal and might cause discomfort. In the event that any questions asked are disturbing, you may skip any questions or stop responding to the survey at any time. If you experience any discomfort in responding to these questions and would like to speak with someone please copy and paste the link below into a new browser to contact a resource:

Benefits

The results of the survey will provide important information about our campus climate and will help us in our efforts to ensure that the environment at Iowa State is conducive to learning, living, and working.

Voluntary Participation

Participation in this assessment is voluntary. If you decide to participate, you do not have to answer any questions on the survey that you do not wish to answer. Individuals will not be identified and only group data will be reported (e.g., the analysis will include only aggregate data). Please note that you can choose to withdraw your responses at any time before you submit your answers. Refusal to take part in this assessment will involve no penalty or loss of student or employee benefits.
Statement of Confidentiality for Participation

In the event of any publication or presentation resulting from the assessment, no personally identifiable information will be shared. Your confidentiality in participating will be insured. The external consultant (Rankin & Associates) will not report any group data for groups of fewer than 5 individuals that may be small enough to compromise confidentiality. Instead, Rankin & Associates will combine the groups to eliminate any potential for demographic information to be identifiable. Please also remember that you do not have to answer any question or questions about which you are uncomfortable. The survey has been approved by the Iowa State Institutional Review Board.

Statement of Anonymity for Comments

Upon submission, all comments from participants will be de-identified to make those comments anonymous. Thus, participant comments will not be attributable to their author. However, depending on what you say, others who know you may be able to attribute certain comments to you. In instances where certain comments might be attributable to an individual, Rankin & Associates will make every effort to de-identify those comments or will remove the comments from the analyses. The anonymous comments will be analyzed using content analysis. In order to give “voice” to the quantitative data, some anonymous comments may be quoted in publications related to this survey.
